// Experience

Software Engineer, Founder

Found Ark | Bellevue, WA

2022 - present

- Designed and built frontend with React.js and deployed beta on Heroku for user testing and debugging.
- Integrated backend via Express.js and Socket.IO for real time access to internal MySQL database storing user data, hosted by jawsDB via Heroku.
- Integrated external APIs and developed complex conditional rendering based on imported user data.

Software Engineer, Founder

Porefaction | Bellevue, WA

2022 - present

- Designed and built frontend with React.js and deployed beta with GitHub pages for user testing and debugging.
- Integrated Sephora API and developed complex conditional rendering based on imported product data.
- Developed components with clean, reusable code to organize imported data and sort based on product information.

Frontend Software Engineer

Maven Group | Bellevue, WA

2019 - present

- Built the brand and digital presence from the ground up, leading to the team's most successful year to date.
- Responsive web design and deployment increased contract wins, adding \$1.4M in additional sales.
- Deployed dozens of promotional websites, driving overall listing traffic and lead capture metrics.
- Integrated focused social media strategies, organically earning 10X more listing and brand exposure.

General Manager

Bose | Orange, CA / Bellevue, WA

2013 - 2019

- Recognized for excellence in leadership and relocated from Orange, CA to Bellevue, WA.
- Reformed a struggling store and delivered the highest performing team in the US in under one year.
- Awarded locally and nationally for achieving 140% sales growth year over year.
- Pioneered the company's B2C program with a \$0 budget, earning an additional 10% in revenue.
